

Incentives Estimator

About

Small Business Services, Department of City

The NYC Business Express Incentives Estimator helps businesses find and learn about city, state, and federal incentives that are directly applicable to their operations. By answering a series of questions regarding their businesses activities, location, and size, users receive a list of incentives programs they are estimated to be eligible for. Additionally, the Incentives Estimator also provides users with pro forma calculations for estimated savings with an estimated yearly benefit schedule based on their answers. **Please note that the Incentives Estimator is currently being updated and will be released in Spring 2017.**

Incentives are savings on taxes, energy costs, and other operating costs offered to businesses that are relocating, expanding, renovating, purchasing equipment, or hiring and training employees. Incentives are intended to help businesses save money and further city, state and federal economic development goals.

Visit the following page to bookmark the tool, which will be released in Spring 2017:
